

HEIN ZAW (Harry)

Sydney | heinhzettaw2909@gmail.com | LinkedIn | +61 493 304 365

Data Science graduate from the University of Sydney with a strong foundation in data science and operations. Possesses experience in data analysis, SQL querying, and creating reporting dashboards, contributing to a ~5% reduction in expenditure at a previous role. Skilled in Python, machine learning and statistical modelling, with certifications in Python and Data Analysis. Eager to leverage analytical expertise and a proactive approach to drive data-informed decisions and operational efficiency for a forward-thinking organisation.

TECHNICAL SKILLS

Languages: Python, SQL, R, Java, HTML, CSS, Javascript

Libraries & Tools: scikit-learn, XGBoost, Pandas, NumPy, Matplotlib, ggplot2, R Shiny, PostgreSQL/PostGIS, Folium, Git, Jupyter, Databricks, Excel

Methods: Machine Learning, Statistical and Predictive Modelling, Data Transformation and Pipelines, Database Design, Dashboard Development and Reporting, Data Visualisation, Cross-Validation

PROJECTS

Biomedical ML Pipeline & Investment Analysis | 2025

University of Sydney Capstone (supervised by Accenture) · 6-person team

- Applied machine learning and analytical techniques to turn complex biomedical data into a commercial investment recommendation, combining model performance with market analysis to identify the optimal opportunity.
- Built and tuned logistic regression classifiers and defined the standardised model-building workflow used across the team, ensuring four different algorithms (Logistic Regression, Random Forest, k-NN, XGBoost) were trained and evaluated on a consistent, comparable basis.
- Applied five-fold cross-validation, shared feature selection, and common evaluation metrics (accuracy, AUC, sensitivity, specificity, kappa) in which gene expression classifiers achieved over 0.9 cross-validation accuracy (Kappa 0.74 to 0.95).
- Uncovered that the highest-performing classifier did not correspond to the strongest investment opportunity, reframing the team's recommendation and demonstrating how analytical outputs must connect to business outcomes.
- Led the stakeholder presentation of the final R Shiny dashboard, translating model performance metrics and investment trade-offs into clear insights for a non-technical investor audience.

Tools: R, Python

Sydney Urban Data Platform | 2024

- Co-designed and implemented a normalised PostgreSQL/PostGIS database in a 3-person team, integrating 7 open Greater Sydney government datasets into a single spatially indexed relational schema.
- Sourced and integrated the project's only GeoJSON dataset, spatially joining ~880 car-share bay locations to ABS SA2 boundaries in PostGIS, and computed a per-region z-score folded into the team's composite scoring pipeline.
- Queried the integrated dataset with SQL and built exploratory Python/Pandas analysis and interactive Folium heatmaps, surfacing relationships between business density, transport access and demographics across Sydney.
- Contributed to correlation analysis and interactive Folium choropleths across 360 SA2 regions, which found almost no relationship between neighbourhood amenity score and median household income ($r \approx 0.03$).

Tools: PostgreSQL/PostGIS, SQL, Python, Pandas, Folium, Jupyter

PROFESSIONAL EXPERIENCE

Operations Analyst Intern · City Golf Resort Hotel

Dec 2023 – Feb 2024

Yangon, Myanmar

- Turned reservation and property management system data into actionable insights using SQL and Excel, identifying seasonal occupancy trends that supported resource allocation recommendations adopted by the operations team and contributed to a ~5% reduction in off-season expenditure.
- Built and maintained a centralised Excel dashboard tracking weekly and monthly KPIs including occupancy rates, room utilisation, and F&B revenue, used for recurring reporting and ad-hoc analysis to department heads.
- Partnered with operations stakeholders to understand business needs, producing analysis that fed directly into management decision-making and performance reviews.

News Reporter & Operations Coordinator · BCBG

Nov 2024 – Present

Sydney, NSW

- Research, write, and deliver weekly news segments on Myanmar affairs for Sydney's Burmese-speaking community, coordinating guest interviews and editing audio under regular deadlines.

- Track and optimised funding from government grants and the radio station across budget periods, maintaining equipment and asset records as part of channel operations.
- Built and maintained a direct working relationship with the station head, presenting weekly editorial proposals and consolidated funding briefings that shaped programming decisions and resource allocation across the channel.
- Managed end-to-end guest relationships from outreach and scheduling through to on-air and remote interviews

Muay Thai Coach (Kids) · Cortex MMA
Sydney, NSW

Oct 2022 – Present

- Design and deliver weekly classes for children, developing age-appropriate training plans, tracking progress, and providing feedback.

Administrative Assistant · Genius Empire Co., Ltd.
Yangon, Myanmar

Feb 2020 – Nov 2021

- Streamlined office workflows by implementing a digital filing system and standardised templates, reducing document retrieval time.
- Processed invoices, expense reports, and purchase orders, and supported HR onboarding and employee records.

EDUCATION

The University of Sydney | Bachelor of Computing — Major: Data Science · Sydney

Feb 2022 – Sep 2025

Taylors' College | University Foundation Program · GPA 8.3/10 · Sydney

Feb 2021 – Nov 2021

CERTIFICATIONS

PCEP: Certified Entry-Level Python Programmer
IBM: Machine Learning with Python
IBM: Data Analysis with Python
IBM: Python for Data Science and AI
Google: IT Support Professional Certificate
